

CHART YOUR PATH TO SUCCESSFUL MULTI-CLOUD

Establishing a multi-cloud strategy is a powerful way to accomplish your organization's short-term and long-term transformation goals

USE THIS 5-STEP PROCESS TO CHART YOUR JOURNEY AND ACCELERATE YOUR DECISION MAKING

1 ASSESS NEEDS

- + Identify how you will use your cloud infrastructure today and tomorrow
- + What are your current and future use cases?
- + Use cases can include app migration, data center modernization, scale and disaster recovery, and more

2 EVALUATE MULTI-CLOUD OPERATIONS

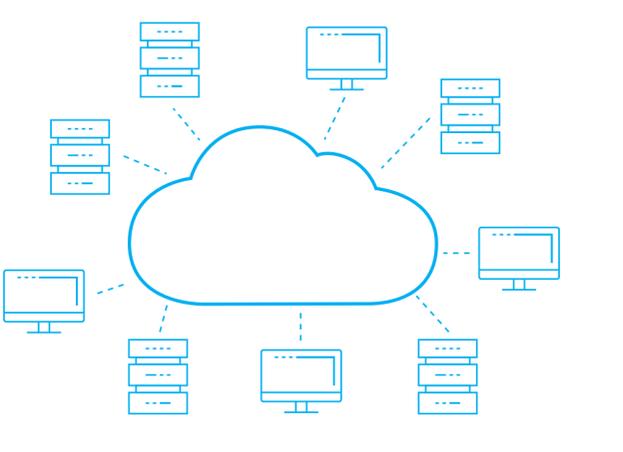

- + Determine how the services you need will impact your people, processes, and governance
- + Consider the teams and roles you need to successfully deliver services on-premises and operate across cloud environments
- + Keep costs, service quality, agility, and risk questions in mind

3 EVALUATE PUBLIC CLOUD

- + Figure out which public cloud(s) and cloud provider(s) can best meet your needs
- + Prioritize your requirements around services, security and governance, and architecture
- + Consider IT service delivery, app modernization, developer productivity, CapEx and OpEx, and more

4 OPTIMIZE PRIVATE CLOUD

- + Use your private cloud to build on and enhance your current IT environment
- + Determine your capabilities for a modern infrastructure, service delivery, security and policies, and networking and perimeter (branch/edge)
- + Think about whether private cloud can accommodate existing investments, support aging systems, integrate with current IT operations stacks, and more

5 GET STARTED

GET STARTED

- + Simplify your multi-cloud journey with VMware Cloud
- + Transforms private data centers, hyperscalers, and remote sites into a unified, elastic multi-cloud platform
- + Optimizes compute, network, storage, security, Kubernetes, and cloud management to securely and reliably deliver any application, everywhere

SUMMARY

Team up with VMware for a complete multi-cloud solution

We offer all the software products and services you need to gain the maximum benefit from clouds

We can help you with your multi-cloud planning and execution, no matter which public cloud provider(s) you choose
